This game is FUN.

When first starting the game, if using an controller, use the mouse on the main menu first, and keep using it until the character select screen. Once in the game, it brings back old school memories and you. will. die.

Good luck!. Little and fun aerial combat multiplayer game. Even after many years there are people playing it. Since it's now free to play there is no reason why you shouldn't at least check it.. This is the second half of Umineko. It's just about as good as the question arcs, if you ask me.. Can't change keyboard controls

Got stuck on a mission due to bug

Can't skip the mission due to bug

Uninstall. i love that you added a new plane but can you add more and add skins to it like the thunderbird skin for the f16

MUST WATCH !!! It's PLANE to see that this game is perfect
4/10. Crashed on start. Error code -59. Recommended fix actions include reinstalling Windows OS.....

I would steer clear of this program. I got a refund right away. Common issue with this program.. It's really cool and interesting talking with people like in the 1920's. I don't know how accurate it is -but it's fun.
The game has charm but overall I can't really recommend it unless it's on a really good sale and you don't care about the following cons:

First off to navigate the map you need to put your mouse to the edge of it and wait while it scrolls to the appropriate area. This quickly gets tedious since it would be very easy to make the arrow keys or something scroll the map without you having to mouse over everytime. It's a needlessly slow process.

The second con and the biggest is that the game is mostly luck based. You have stats you can increase but you will soon realize that sometimes the only reason you lost - was because of luck. You can win with the worst stats and you can lose with the best. The minigames themselves are a bit fun though.. Chasing Dead is like a B movie with alot of A rate ideas if they were executed well. . Start with the very cool plot of starting off being escape pod dropped toward a planet and mistakenly the pod crashes into a 747 type passenger jet where you start your fighting. you have to gain control of the jet by first taking out all the zombies. Problem. The alien guarding the pilot cabin is difficult to discern. its like a mirage that lightly distorts the visual field when in your presence.

The big blems are that when you kill the zombies , they fragment like old school virtual reality tank v tank renderings. Theres a few less quality angles like that that put a limit to enthusiasm. On the otherhand . for 10\$, not too shabby and a decent play. Oh yeh, theres a hospital. this is a scene where i've gotten alot more scared than any other game ever offered for 4x the cost. The floating security drones are cool, Its like Roger Wilco Pentium 2 bad cough medicine trip with formidable play for what you spent. The video footage of being updated of the missions is not great quality but in the theme of the game itself seems to be very realistic. AND the alien headquarters underground is similar to dead space with better lighting and humanish guards to attack as well. The variety of species for this thing is pretty good. can drive tanks, can outwit unusually large aliens that would otherwise cheaply stomp you with 4 story legs. The thing towers over the deserted town. merely ok automated threat, and assortment of weapons and take some time to get familiar with reloading and swapping\ unloading weapons buttons.. Truly a game needing a learning curve for budget entertainment. Still tho .. for ten bucks you get \$19 of game.. Loads of fun, lots of variety with clean controls and movement. You can tackle the levels at your own pace and with your own style, I look forward to more scenic variety and the hopeful addition of many more steam achievements. But this game is certainly on the right track and even on day one it sports enough content to justify an early access purchase, atleast for me!. I got this game and it was an instant hit for me. The combat system is amazing and at first i thought you couldnt level up your skills past the fourth point but you can and its a genius idea. The monsters big, annoying and it can be hard sometimes but its all worth it. All the warlocks themselves are really unique. I suggest this game and give it a 9.5\10. I enjoy the horror genre but with many of the newer games they don't leave such a dark and eerily haunting presence such as the old horror games for playstaion 1 like Silent Hill. Added to it most games leave out the fun little puzzles that make your game worth wild and being chased by murderous enemies you can't fend off until you find their cryptonite or solve the gruelingly dark mystery. This game stays true to that classic feel and I can't wait to play all the episodes.

-The bad maybe of this game is that you might have it crash before starting but the easy fix is your graphics on low.. I like the Game idea and i have somethings i would like to say

1. Ground/Wall textures glitch out
2. reminds me to much of csgo
3. Skins glitch out
4. plz add a more decorative home screen

I would play this game so much if more people played

P.S Keep up the good work Devs ;)
